

## ABSTRACT

The present invention relates to an interlabial product and an individual wrapping body provided with a form for securing a finger, and a manufacturing method therefor, and provides an interlabial pad individual wrapping container which can be used as a suitable operation member when fixing or unfixing the interlabial pad.

Two left hand fingers are inserted in the finger insertion openings (13A, 13B) formed by the belt body (12) attached to the wrapping container (1), to separate the wrapping container (1) into the sections (1A) and (1B) along the separation part (15) by opening these fingers to the left and right, and in this state as it is, the insertion work is carried out for fixing the interlabial pad (2) held on a right hand fingertip between labia.
